ManaTuner

MTG MANABASE CALCULATOR

Brand book · Edition 2.8 Mirror
Snapshot of manatuner.app · 2026-05-15

01 Identity

"The only mana calculator that counts your dorks & rocks."

ManaTuner ships two surfaces under one identity: a free MTG mana calculator (Karsten math, Monte Carlo mulligan, 13 ramp types) and a 54-resource competitive reading library across 5 tracks (First FNM, RCQ, Pro Tour, Commander Pod, Limited).

i **Authenticity**
The mana palette is the canonical Wizards colour set — no pastelization, no desaturation.

ii **Knowledge tier**
The Library is a first-class product surface, not a sub-feature. Its blue→purple "Knowledge" gradient marks it as the high-tier counterpart to the calculator's brand blue.

iii **Quiet UI, loud subject**
Cinzel serifs for headings, Roboto cascade for body, parchment ground for surface.

02 Colour

Swatch	Name	Role
#F8F6D8	White	Plains
#0E68AB	Blue	Island
#150B00	Black	Swamp
#D3202A	Red	Mountain
#00733E	Green	Forest
#CBC5C0	Colorless	Wastes
#E9B54C	Multicolor	Gold

Swatch	Role
#1565C0	Brand · primary
#0D47A1	Brand · deep
#7B1FA2	Secondary
#1976d2	Theme-color
#F5F3EE	Parchment bg
#FFFFFF	Paper
#1A1A1A	Ink primary
#0D0D0F	Dark bg

03 Typography

H1 — **Will your deck cast its spells on curve?**
Cinzel · 700 · 3rem · lh 1.2 · ls 0.02em · production <title>

H2 — **That counts your dorks & rocks**
Cinzel · 600 · 2.5rem · lh 1.3 · ls 0.01em

H3 — **Castability & tempo, not just lands**
Cinzel · 600 · 2rem · lh 1.4

H4 — Built for FNM grinders and PT qualifiers
Cinzel · 500 · 1.5rem · lh 1.4

Body — Stop guessing. Get exact cast odds for every spell, plus know exactly when to mulligan — backed by hypergeometric math and Monte Carlo simulation.
Roboto · 400 · 1rem · lh 1.6

Mono — `hypergeom.atLeast(succ=4, total=60, draws=7)`
JetBrains Mono cascade (not loaded → system mono)

Fonts loaded from the network

Roboto	300 / 400 / 500 / 700
Cinzel	400 / 600 / 700
Mana Font	1.18.0 (CDN)

Inter, Poppins, JetBrains Mono, Fira Code, and Playfair Display are referenced in cascades but not loaded — they fall back to the next item, ultimately resolving to Roboto or system sans.
